## About the Missouri Census Data Center

The Missouri State Library in the Office of the Secretary of State has been the lead agency for the United States Census Bureau's State Data Center Program since the program was initiated in the late 1970s. The program operates under a memorandum of understanding between the Office of the Secretary of State and the Census Bureau. The purpose of this partnership is to provide training opportunities, consultation services, and access to census information in a variety of formats to Missouri residents.

Coordinating members work closely with the lead agency and enrich the program by providing expertise and census support services in a variety of areas. These areas include: Web-based census applications, population projections, mapping and geographic information system (GIS) services, and business and economic analysis.

The Missouri Census Data Center Program is please to provide these print reports free of charge thanks to a special appropriation for Census 2000 print products from the Missouri State Legislature. **Additional Census 2000 data and other demographic information is available on the Missouri Census Data Center website at <http://mcdc.missouri.edu>.**

Program participants and telephone and e-mail contact information is listed below:

### ***Helpful information for interpreting this report***

- The term “value” (used as a header in this publication) is synonymous with “total number.”
- There were five major race categories in 1990, compared to six major race categories in 2000:

<b>1990 census</b>	<b>2000 census</b>
White	White
Black	Black or African American
American Indian, Eskimo, or Aleutian	American Indian or Alaska Native
Asian or Pacific Islander	Asian
Other race	Native Hawaiian and Other Pacific Islander
	Other race

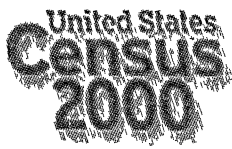

- Census 2000 marked the first time respondents could select more than one race category. Therefore, the first number you see under “value” and “percent” in the race categories indicates the number who chose that race alone, the second number or percentage (always a number or percent equal to or greater than the first number) indicates the total number who selected this race alone plus the number who selected this race in combination with one or more additional races.
- When adding numbers by race to obtain a total population in Census 2000, add the numbers for: 1) white alone, 2) Black or African American alone, 3) American Indian or Alaska Native alone, 4) Asian alone, 5) Native Hawaiian and Other Pacific Islander alone, 6) other race alone, and 7) total multi-racial.
- Hispanic or Latino is an ethnic designation, not a race category. Persons of Hispanic origin and Latino population can be of any race.

For more detailed background information and links to the actual data files, see the following Missouri Census Data Center webpages:
